EXPERIENCE

Self-Employed, Remote — *Web Developer*

January 2018 - PRESENT

Acted as the sole developer across several projects from beginning to end for a small list of clients. Responsible for building decentralized marketplaces, payment gateways, etc.

Qualta Consulting LLC, Location — *Quality Assurance*

December 2015 - February 2016

Tested data visualization software written in C# for bugs both by hand and via automated testing.

EDUCATION

WGU, Remote — B.S. Computer Science

February 2022 - Present

Columbia Basin College, Pasco, WA — *AAS IT*

August 2016 - January 2018

PROJECTS

Matic Name Service — *Decentralized name service*

Built a decentralized naming service similar to the Ethereum Name Service that allows users to maintain a decentralized online identity as well as receive assets using a human-friendly domain name.

Plutus — *Cryptocurrency payment gateway*

Built a cryptocurrency payment gateway that supports Bitcoin and Monero. Designed with user privacy in mind, all sensitive information is encrypted in memory and never written to disk.

HARD SKILLS

JavaScript (React, TypeScript)

Golang

Rust

Solidity

Git

SOFT SKILLS

Problem solver

Self-driven

Adaptable

Critical thinker

Clear communicator
